Wellness Score (0–5) is algorithmically calculated by Feelwell from: (1) exercise adherence and completion rate, (2) conversation content and topic patterns, (3) language coherence, (4) mood fluctuation frequency, (5) crisis/self-harm language detection. Mood mapped as: Reflective: 0.5–1.0 | Happy: 0.1–0.49 | Engaged: −0.1–0.1 | Stressed: −0.49–(−0.1) | Lonely: −1.0–(−0.5).

Clinical Instruments: PHQ-9/PHQ-A (Kroenke & Spitzer) — validated for depression screening ages 12+. GAD-7 (Spitzer et al.) — generalized anxiety disorder, ages 13+. PCL-5 — PTSD Checklist for DSM-5, ages 18+. SCARED (Birmaher et al., 1997) — Screen for Child Anxiety Related Disorders; 5 subscales: panic disorder, generalized anxiety, separation anxiety, social phobia, school avoidance; clinically validated ages 8–18; self-report and parent-report versions. SDQ (Goodman, 1997) — Strengths and Difficulties Questionnaire; 5 subscales: emotional symptoms, conduct problems, hyperactivity/inattention, peer relationship problems, prosocial behavior; ages 4–17; self-report and parent-report versions available. Note: SCARED and SDQ are administered at intake and each follow-up interval (30/60/90 days) for youth patients. N/A if patient is 18+.

8. Crisis & Escalation Events Log

> Feelwell monitors all sessions for self-harm language, community harm references, substance abuse, and rapid mood fluctuations — even within short monitoring periods. Crisis events below must be reviewed and attested by the provider before report is filed.

Total Crisis Events: {{CRISIS_EVENT_COUNT}} | **988 Referrals:** {{REFERRAL_988_COUNT}} | **Provider Notifications:** {{PROVIDER_NOTIFICATION_COUNT}} | **Emergency Contact Notifications:** {{EMERGENCY_CONTACT_NOTIFICATION_COUNT}}

Date	Event Type	Severity	Platform Action Taken	Outcome / Follow-Up

{{CRISIS_DATE_3}}	{{CRISIS_TYPE_3}}	**{{CRISIS_SEV_3}}**	{{CRISIS_ACTION_3}}	{{CRISIS_OUTCOME_3}}

> Severity levels: High (immediate self/community harm language — real-time provider alert + 988 referral + emergency contact notification per clinic protocol) | Medium (substance abuse, rapid mood swings) | Low (general distress flagged for provider review). All protocols apply regardless of monitoring period length.

9. CPT 98979 — Provider Time Log (10–19 Minutes Required)

CPT Code	**98979 —** Remote therapeutic monitoring treatment management services, physician or other qualified healthcare professional time in a calendar month

	requiring at least 1 real-time interactive communication with the patient or caregiver during the calendar month; first 10 minutes.
Time Threshold	10–19 minutes of documented provider time in the calendar month
Minimum Time Required	10 minutes (below 10 min — DO NOT bill 98979)
Maximum Time for Code	19 minutes (20+ min — use CPT 98980 instead)
Total Provider Minutes	**{{PROVIDER_MINS}} minutes** → **{{98979_ELIGIBLE_STATUS}}**
Interactive Communication	{{INTERACTIVE_COMM_CONFIRMED}} — Date: {{INTERACTIVE_COMM_DATE}} | Method: {{INTERACTIVE_COMM_METHOD}}
Exclusivity Confirmed	98980/98981 NOT billed in this calendar month ✓

⚠ INTERACTIVE COMMUNICATION REQUIREMENT: CPT 98979 requires at least ONE live, real-time interactive communication with the patient or caregiver in the calendar month. Qualifying formats: live video, telephone/audio-only, real-time secure messaging, or in-clinic discussion. Asynchronous messages, emails, or app notifications alone do NOT satisfy this requirement. The interaction time counts toward total provider time but does not need to represent all of it.

9a. Detailed Provider Time Log

All provider time spent reviewing patient data, modifying treatment plans, and communicating with the patient must be documented below. Timestamps are preferred (e.g., '10:05–10:18 AM: 13 minutes reviewing CBT homework data, adjusting exercises, confirming with patient via secure message').

10. CPT 98986 Statement & Medical Device Language

Device Supply Verification Statement

> *"During the 30-day monitoring period from {{REPORT_START_DATE}} to {{REPORT_END_DATE}}, the patient used the Feelwell remote therapeutic monitoring device (digital cognitive behavioral therapy platform) on {{DAYS_USED}} distinct days (2–15 days required for CPT 98986), with data transmissions supporting the patient's behavioral health treatment. Device supply, data access, and data transmission services were provided to enable ongoing monitoring of the patient's response to cognitive behavioral therapy. CPT 98978 was NOT billed for this patient in this 30-day period."*

Provider Attestation & Signature

I, {{PROVIDER_NAME}}, credential {{CREDENTIAL}}, NPI {{NPI}}, hereby attest that:

1. I personally reviewed the patient's Feelwell remote therapeutic monitoring data during the 30-day period from **{{REPORT_START_DATE}}** to **{{REPORT_END_DATE}}**.
2. The patient used the Feelwell remote therapeutic monitoring device on **{{DAYS_USED}} days** (2–15 days required for CPT 98986). CPT 98978 was NOT billed for this patient in this 30-day period.
3. I spent **{{PROVIDER_MINS}} minutes** reviewing patient data and communicating with the patient this calendar month, qualifying for CPT 98979 (10–19 minutes). CPT 98980 and 98981 were NOT billed for this patient this calendar month.
4. At least one real-time, live interactive communication occurred with the patient or caregiver on **{{INTERACTIVE_COMM_DATE}}** via **{{INTERACTIVE_COMM_METHOD}}**, satisfying the CPT 98979 interactive communication requirement.
5. The data obtained from Feelwell was clinically meaningful and informed my treatment decisions during this period.
6. I reviewed and responded to all flagged crisis/escalation events documented in Section 8 of this report.
7. The short monitoring period (2–15 days) was clinically appropriate for this patient. Clinical rationale: **{{CLINICAL_RATIONALE_FOR_SHORT_PERIOD}}**.
8. The remote therapeutic monitoring was ordered by a qualified health professional: **{{PROVIDER_NAME}}**, **{{CREDENTIAL}}**, NPI **{{NPI}}**.

11. Clinical Narrative

> Patient used the Feelwell app on {{DAYS_USED}} days during the monitoring period (short-period pathway: 2–15 days, CPT 98986). The patient engaged in {{TOTAL_SESSIONS}} total sessions with an average session time of {{AVG_SESSION_DURATION}}. Overall treatment plan adherence was {{OVERALL_ADHERENCE_PCT}}%. Patient's wellness score trended {{WELLNESS_TREND}} from {{WELLNESS_START}} to {{WELLNESS_END}} on a 0–5 scale. {{CRISIS_EVENT_COUNT}} crisis/escalation event(s) were detected and managed per protocol. Provider spent {{PROVIDER_MINS}} minutes in active RTM management including at least one live interactive communication with the patient on {{INTERACTIVE_COMM_DATE}}. CPT codes billed: 98986 (device supply, 2–15 days) and 98979 (provider management, 10–19 min). Codes 98978, 98980, and 98981 were NOT billed this period.

Reference: 2026 CBT RTM Code Set — Complete Comparison

Use this table to confirm which code set applies to this patient. Only one device supply code and one first-increment management code may be billed per patient per period.

CPT Code	Description	Threshold	2026 Rate (Est.)	Use When
98986	CBT device supply for data access/transmission	2–15 days / 30-day period	~$50–55 (est.)	Patient used platform 2–15 days this period
98978	CBT device supply for data access/transmission	≥16 days / 30-day period	~$55–60	Patient used platform 16+ days this period
98979	Provider management time — first increment	10–19 min / calendar month | ≥1 live interaction	~$29–34 (est.)	Provider spent 10–19 min on RTM this month
98980	Provider management time — first increment	≥20 min / calendar month | ≥1 live interaction	~$58–62	Provider spent 20+ min on RTM this month
98981	Provider management time — each additional 20-min block	+20 min each (add-on to 98980 only)	~$41	Provider spent 40+ min total (add-on)

⚠ IMPORTANT FOR FEELWELL PRODUCT TEAM: 98986 is new as of January 1, 2026. Payer fee schedule adoption may lag. Confirm 98986 is included in each provider's payer contract before generating billing report. Some payers may require 2026 contract amendment to include new codes. Biller should verify at provider onboarding.

Developer / Platform Template Notes

All fields in {{DOUBLE_BRACES}} auto-populated by the Feelwell platform. The pathway determination logic (Section 1) should be auto-calculated: if DAYS_USED is 2–15 → generate this report; if DAYS_USED is ≥16 → generate the CPT

98978 report instead. Never generate both reports for the same patient in the same 30-day period. The interactive communication confirmation (Section 9) must be actively logged by the provider — it cannot be inferred from platform data alone. 98979 is billed once per calendar month regardless of how many CBT monitoring modalities are used.
